

**Model 1: Innovation Response (TFP)**  
**(All 5 Matching Methods)**

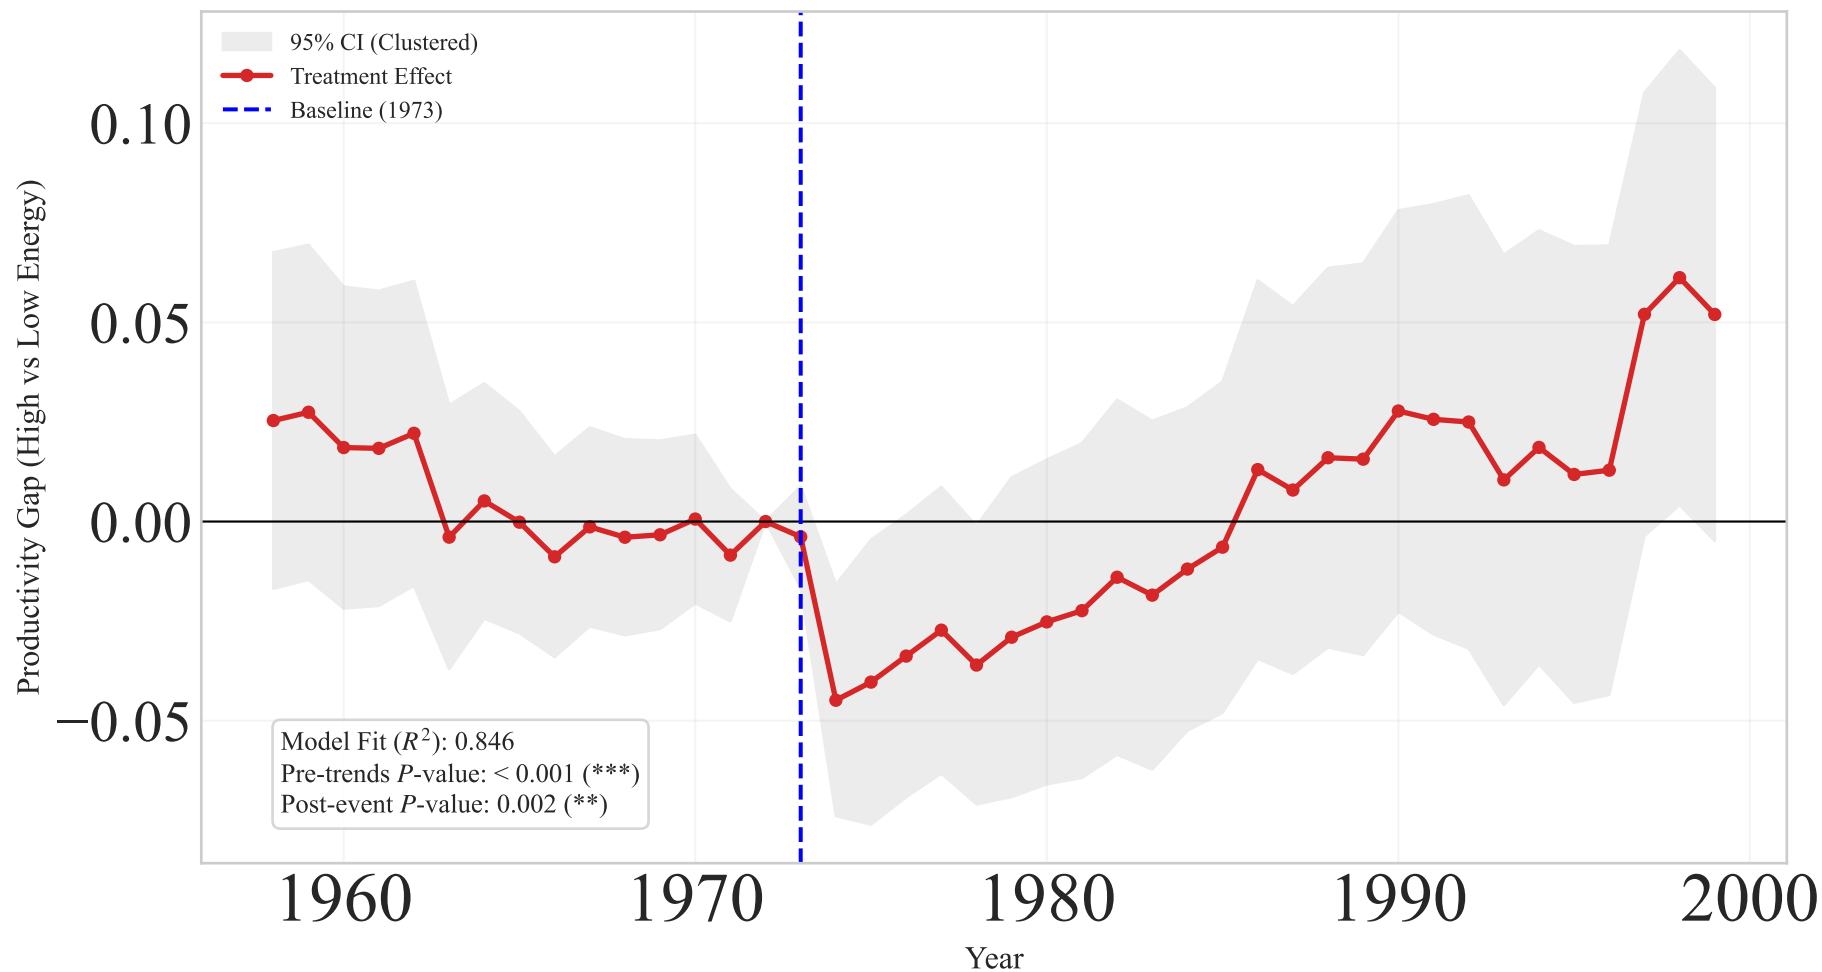

**Model 1: Innovation Response (TFP)**  
**Method: Base 1968-72**

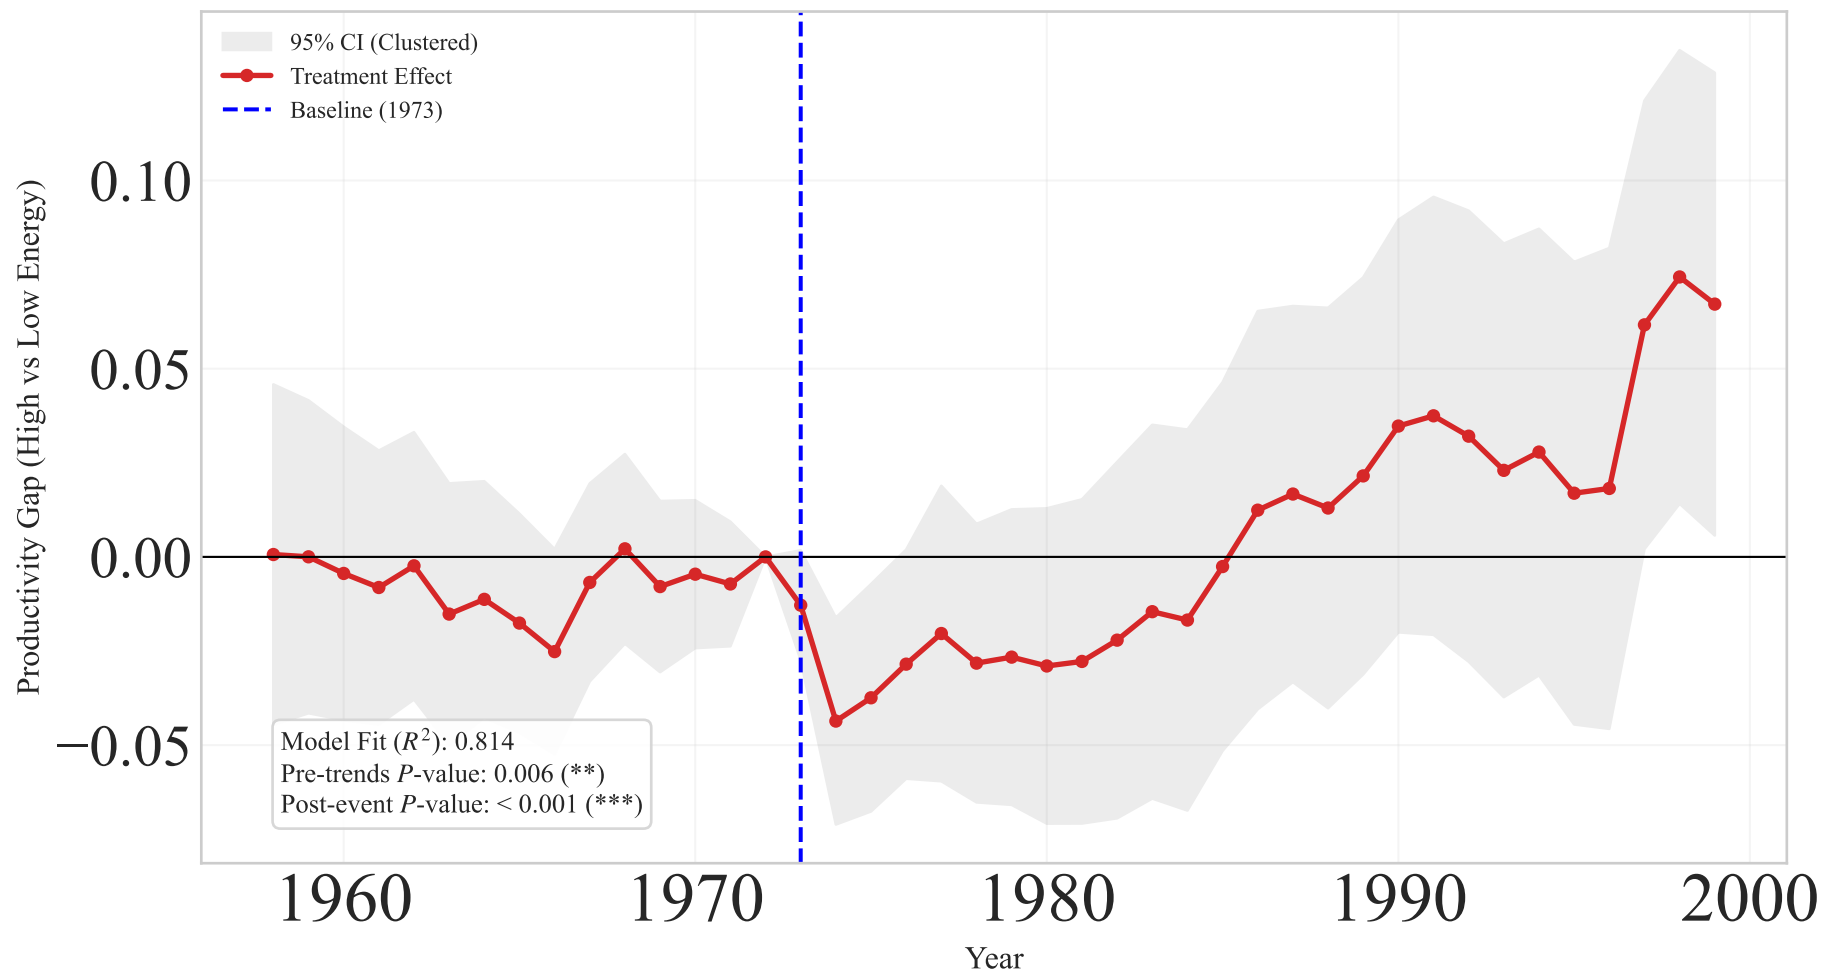

**Model 1: Innovation Response (TFP)**  
**Method: Base 1958-72**

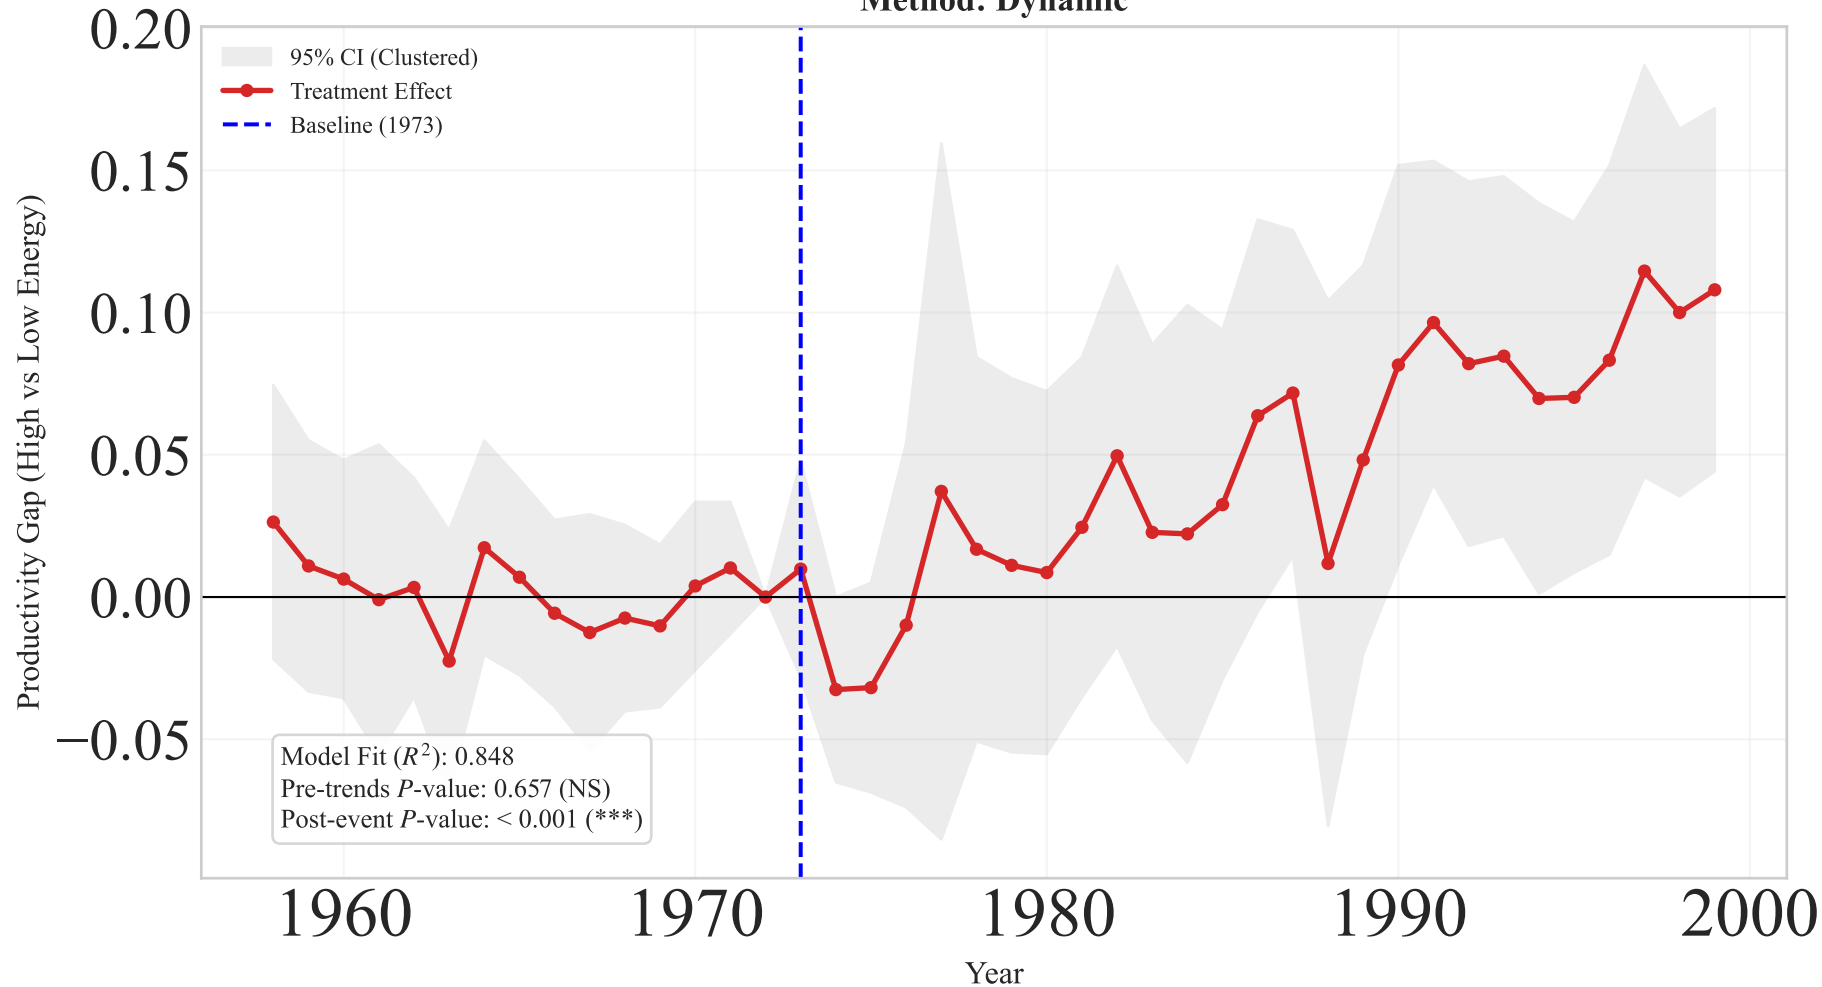

**Model 1: Innovation Response (TFP)**  
**Method: Base 1958**

**Model 1: Innovation Response (TFP)**  
**Method: Base 1972**

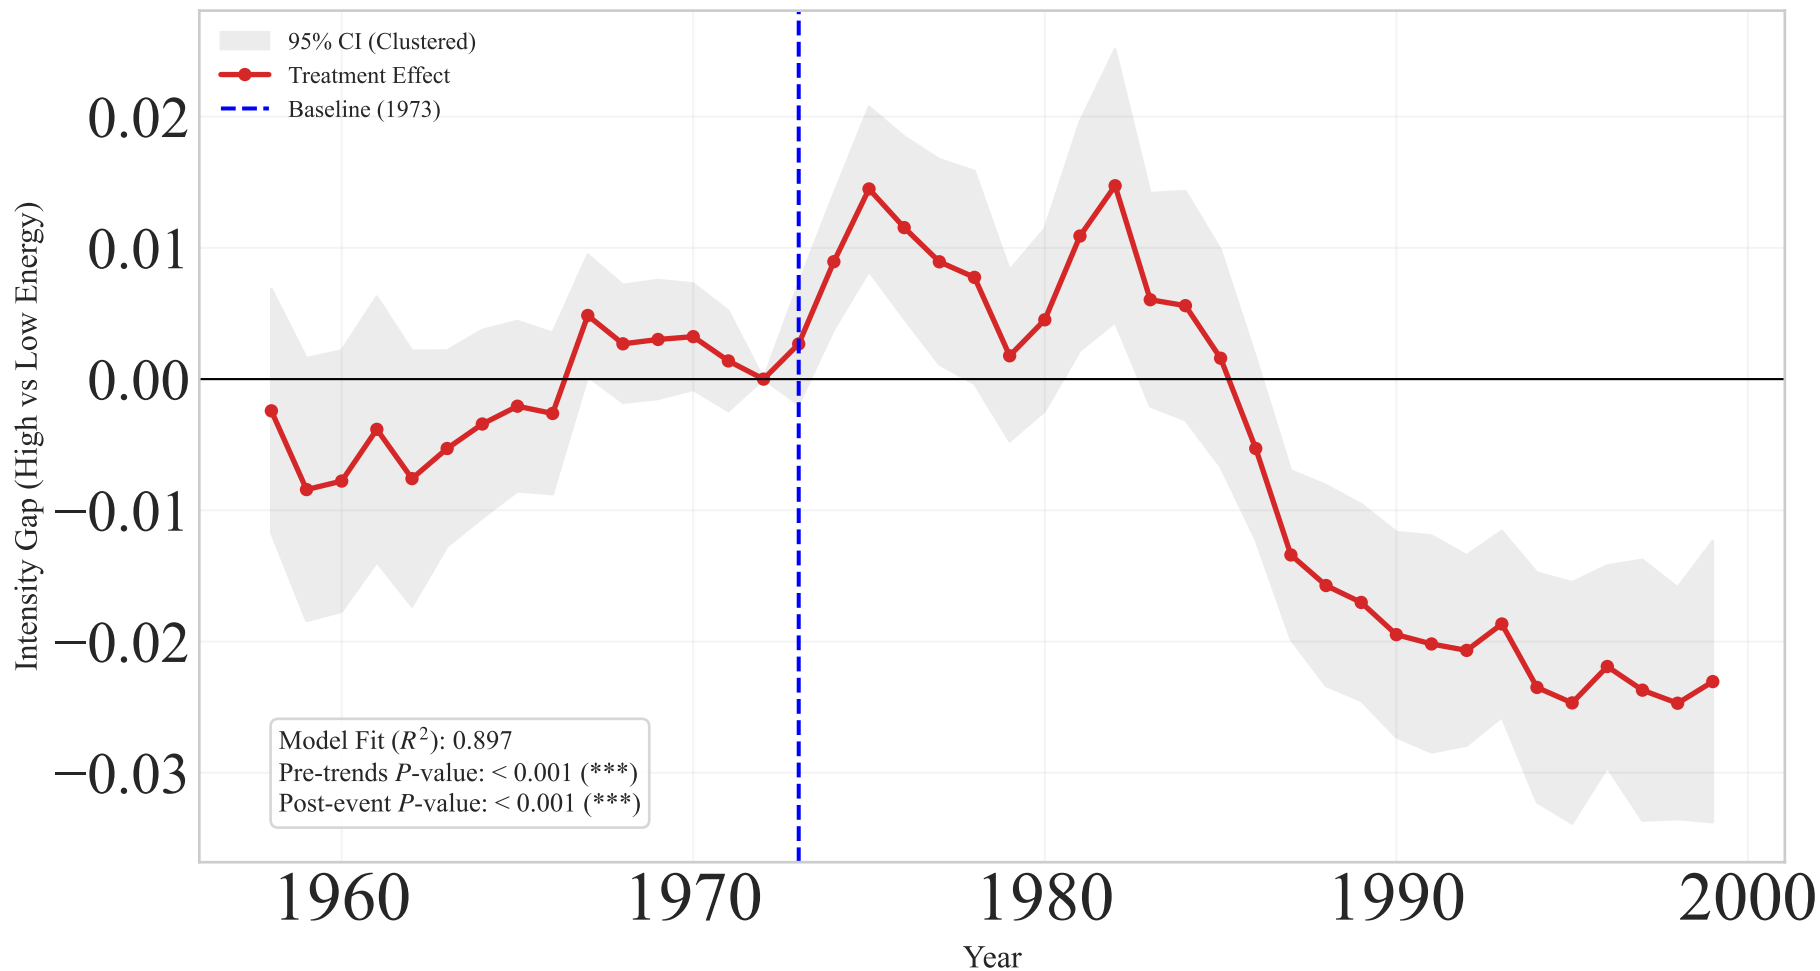

**Model 1: Innovation Response (TFP)**  
**Method: Dynamic**

## **Model 2: Efficiency Adjustment (Intensity) (All 5 Matching Methods)**

## Model 2: Efficiency Adjustment (Intensity)

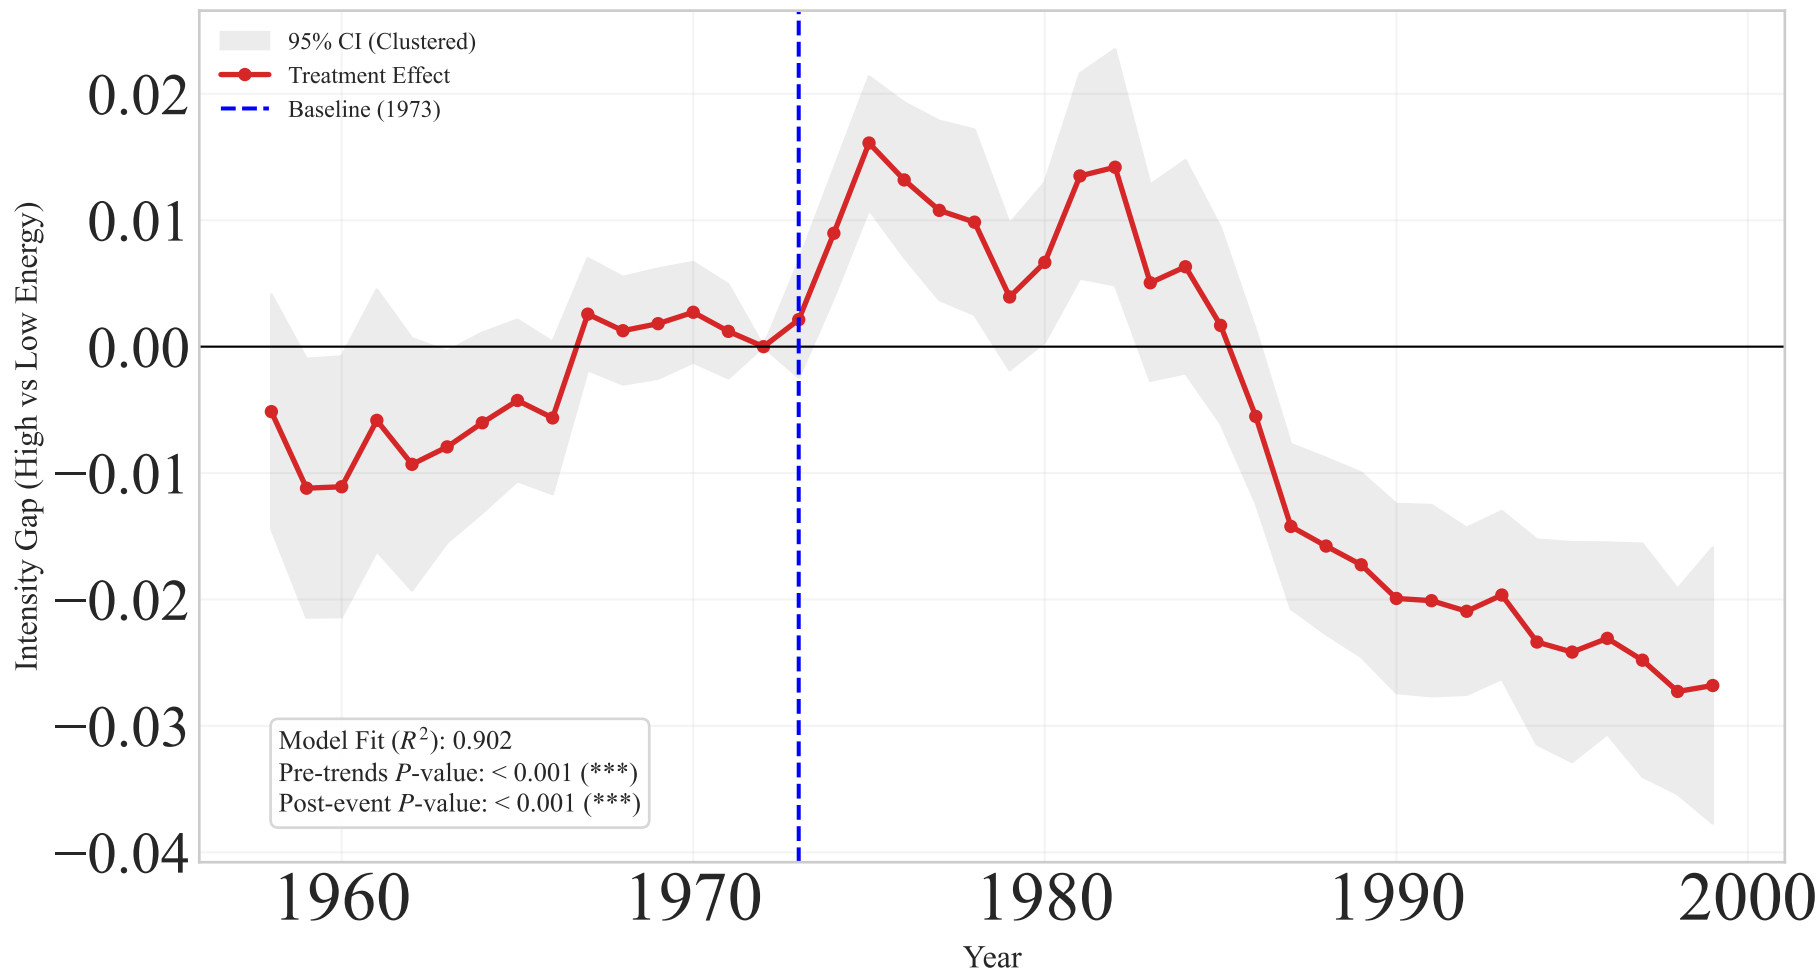

Method: Base 1968-72

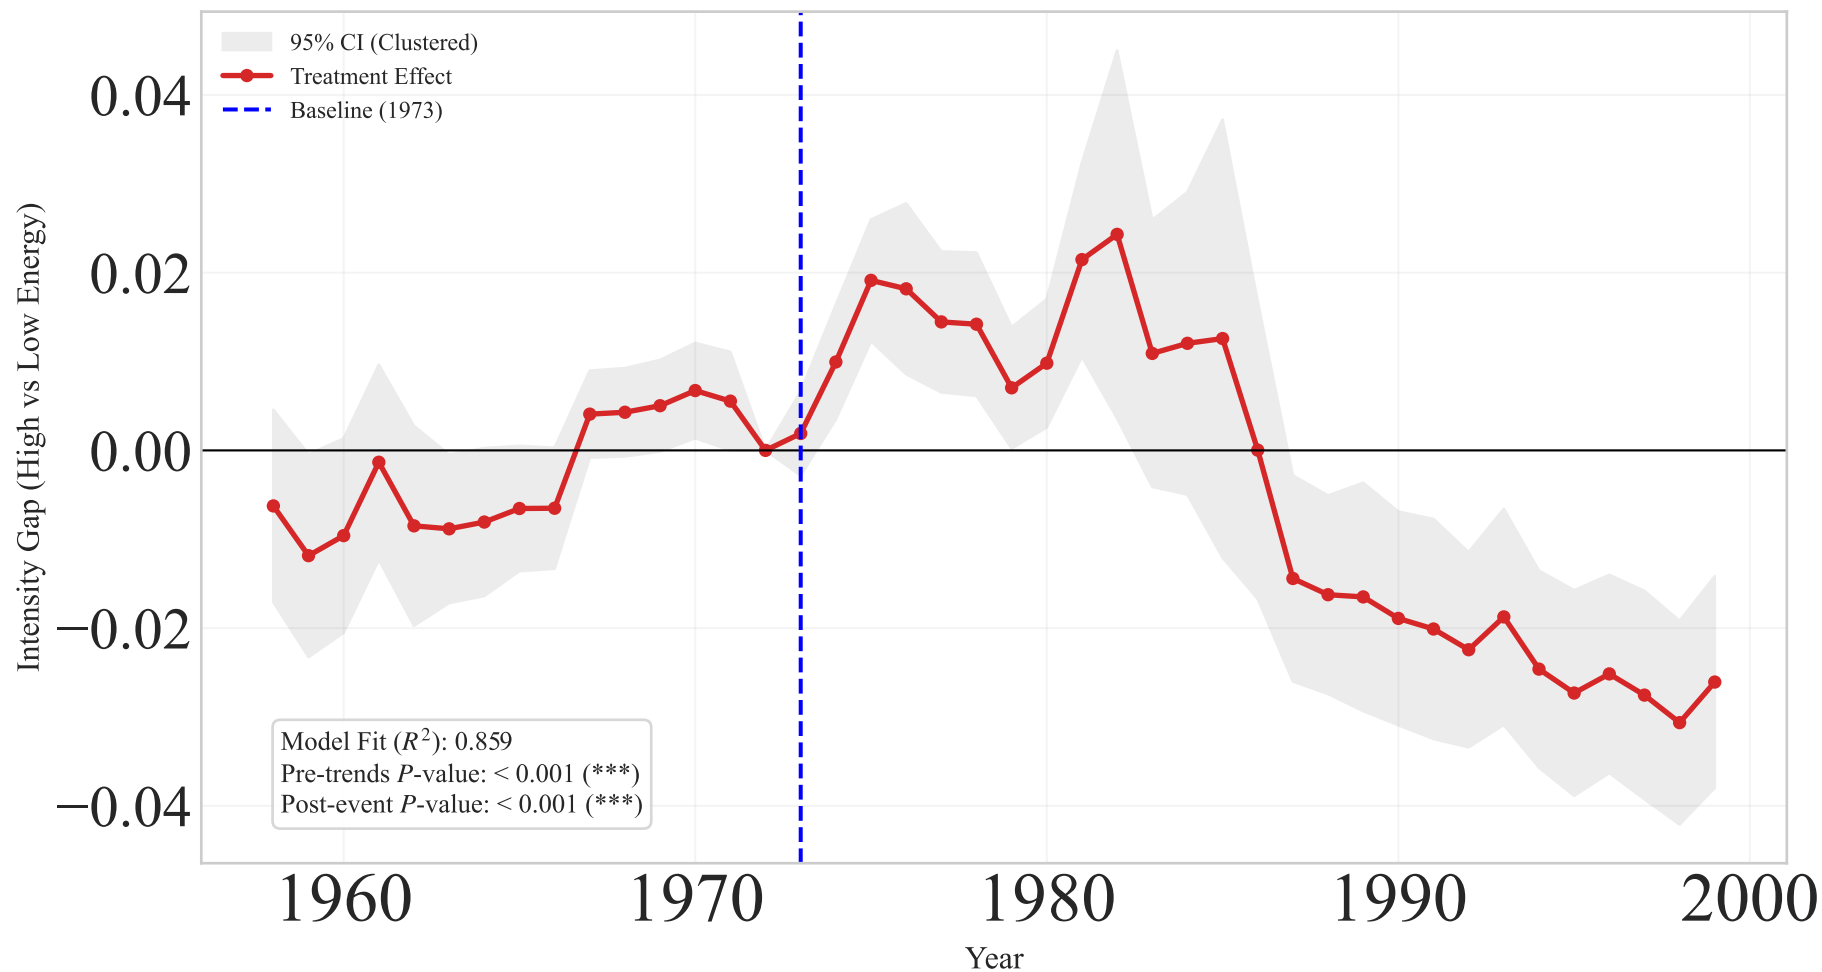

## Model 2: Efficiency Adjustment (Intensity)

Method: Base 1958-72

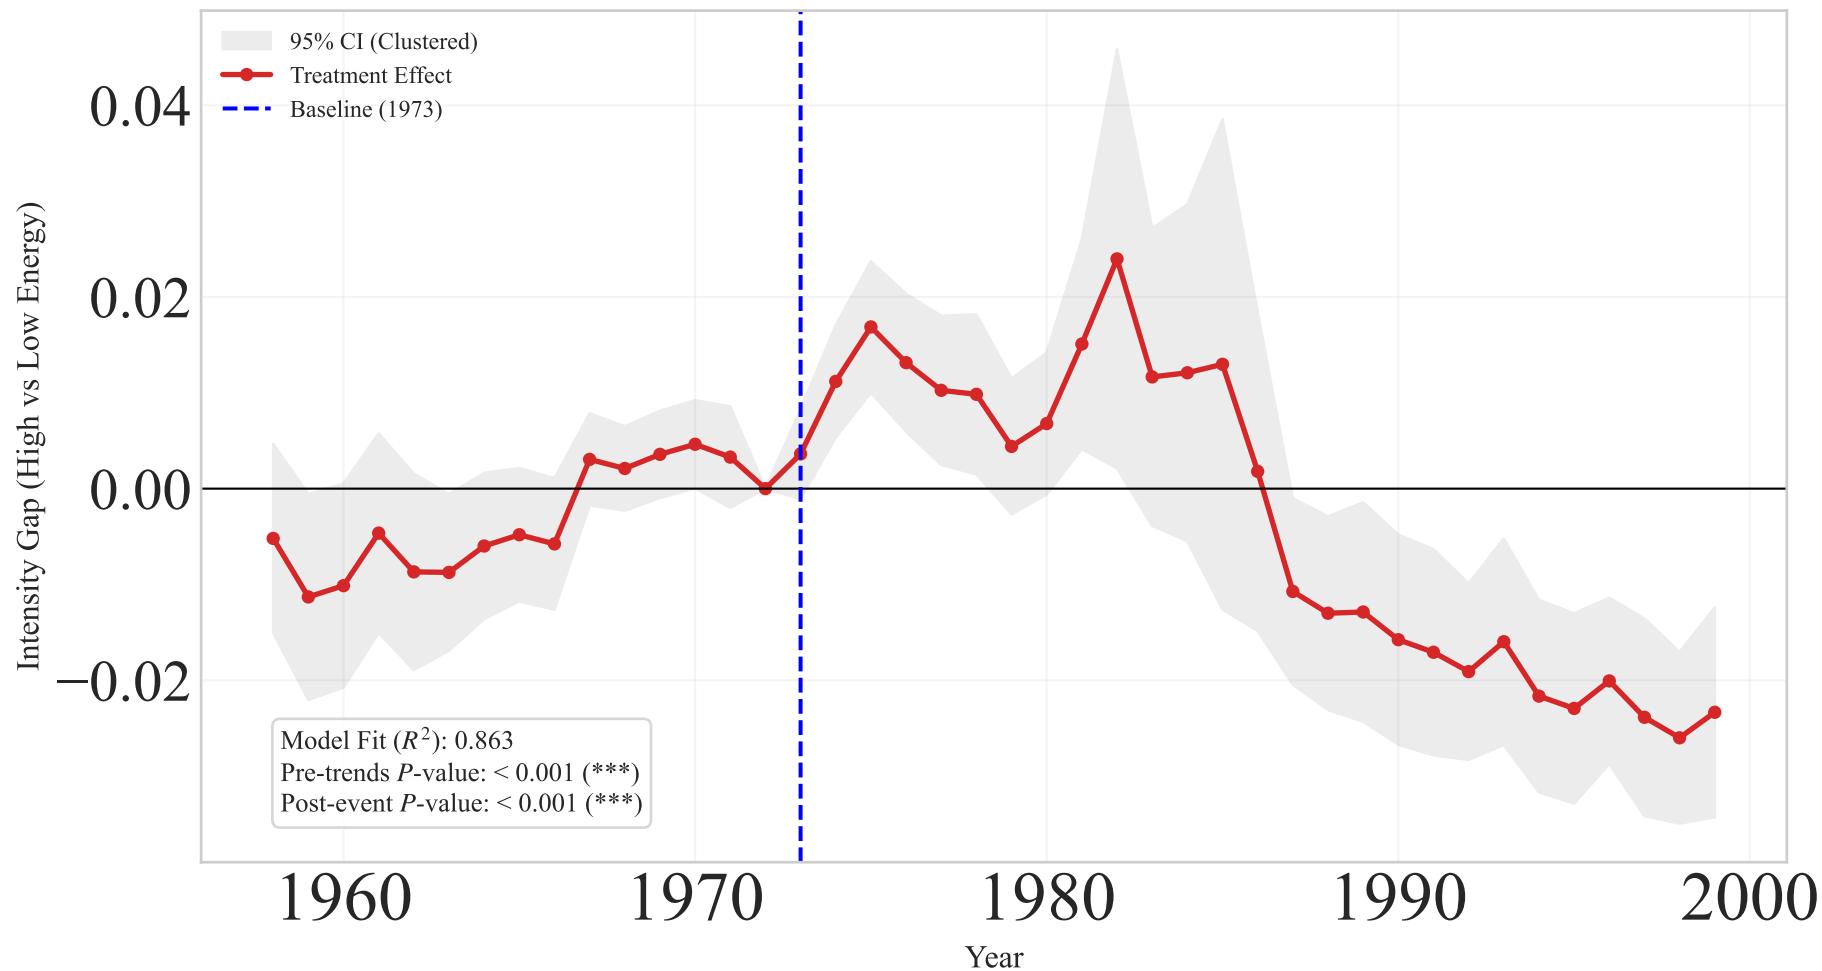

## Model 2: Efficiency Adjustment (Intensity)

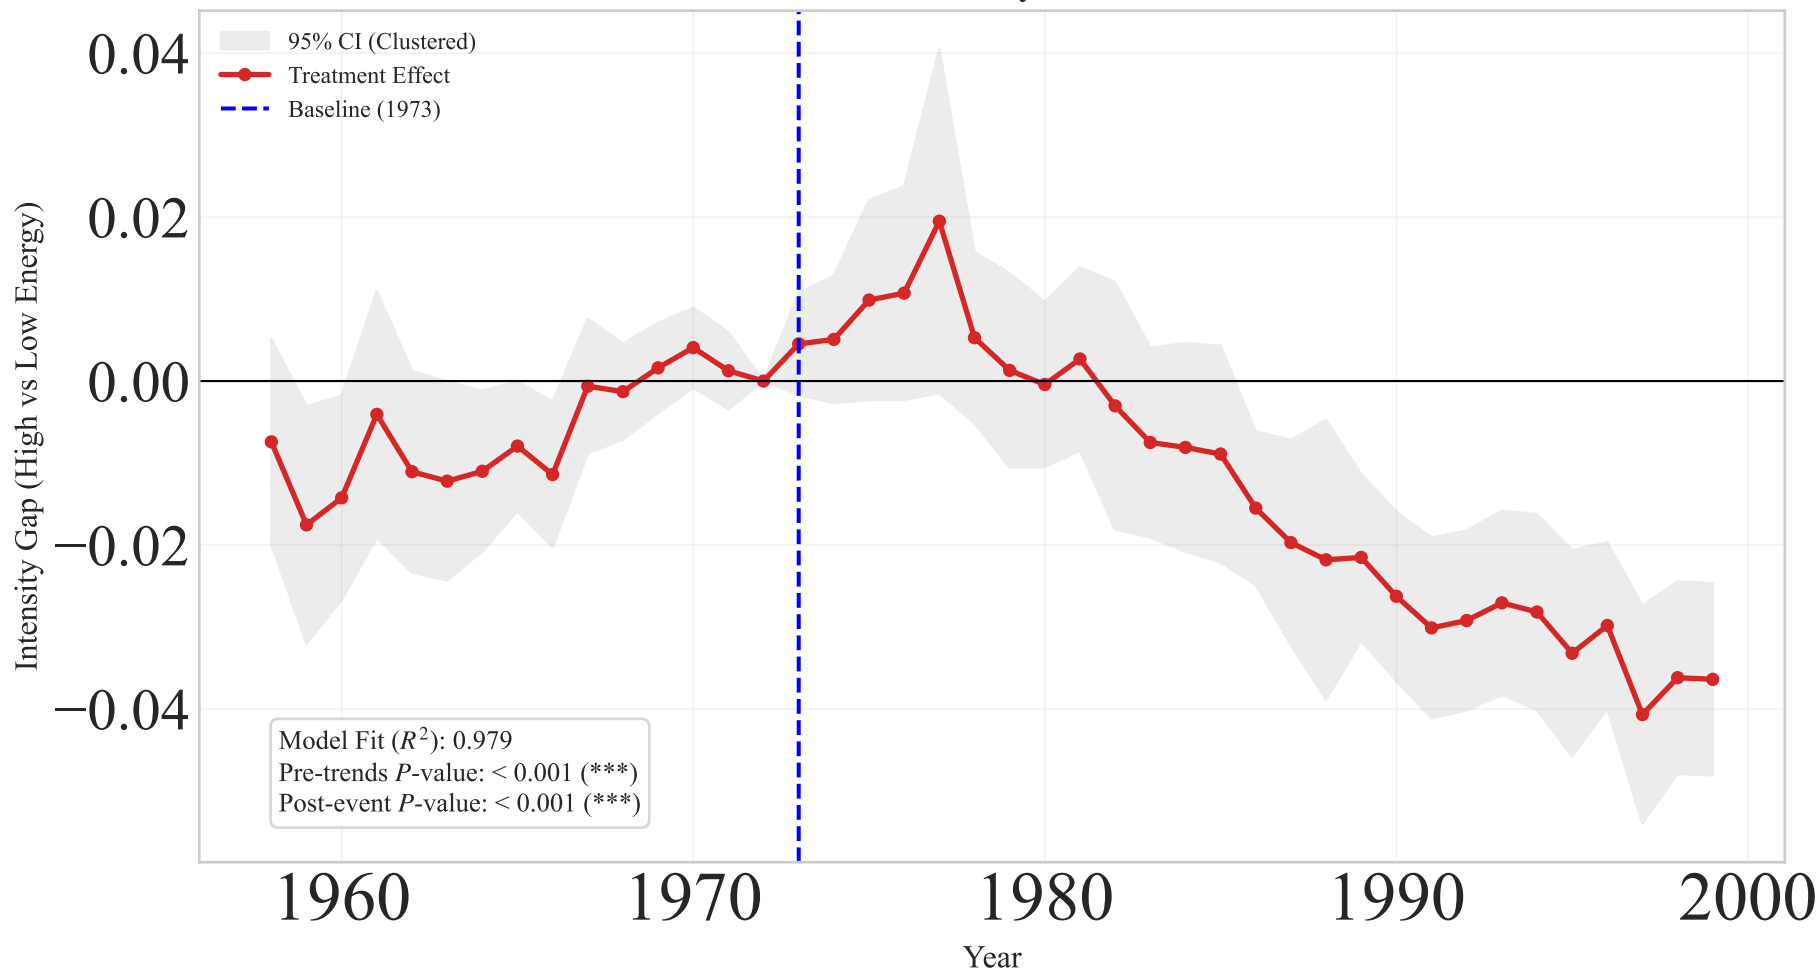

Method: Base 1958

## Model 2: Efficiency Adjustment (Intensity) Method: Base 1972

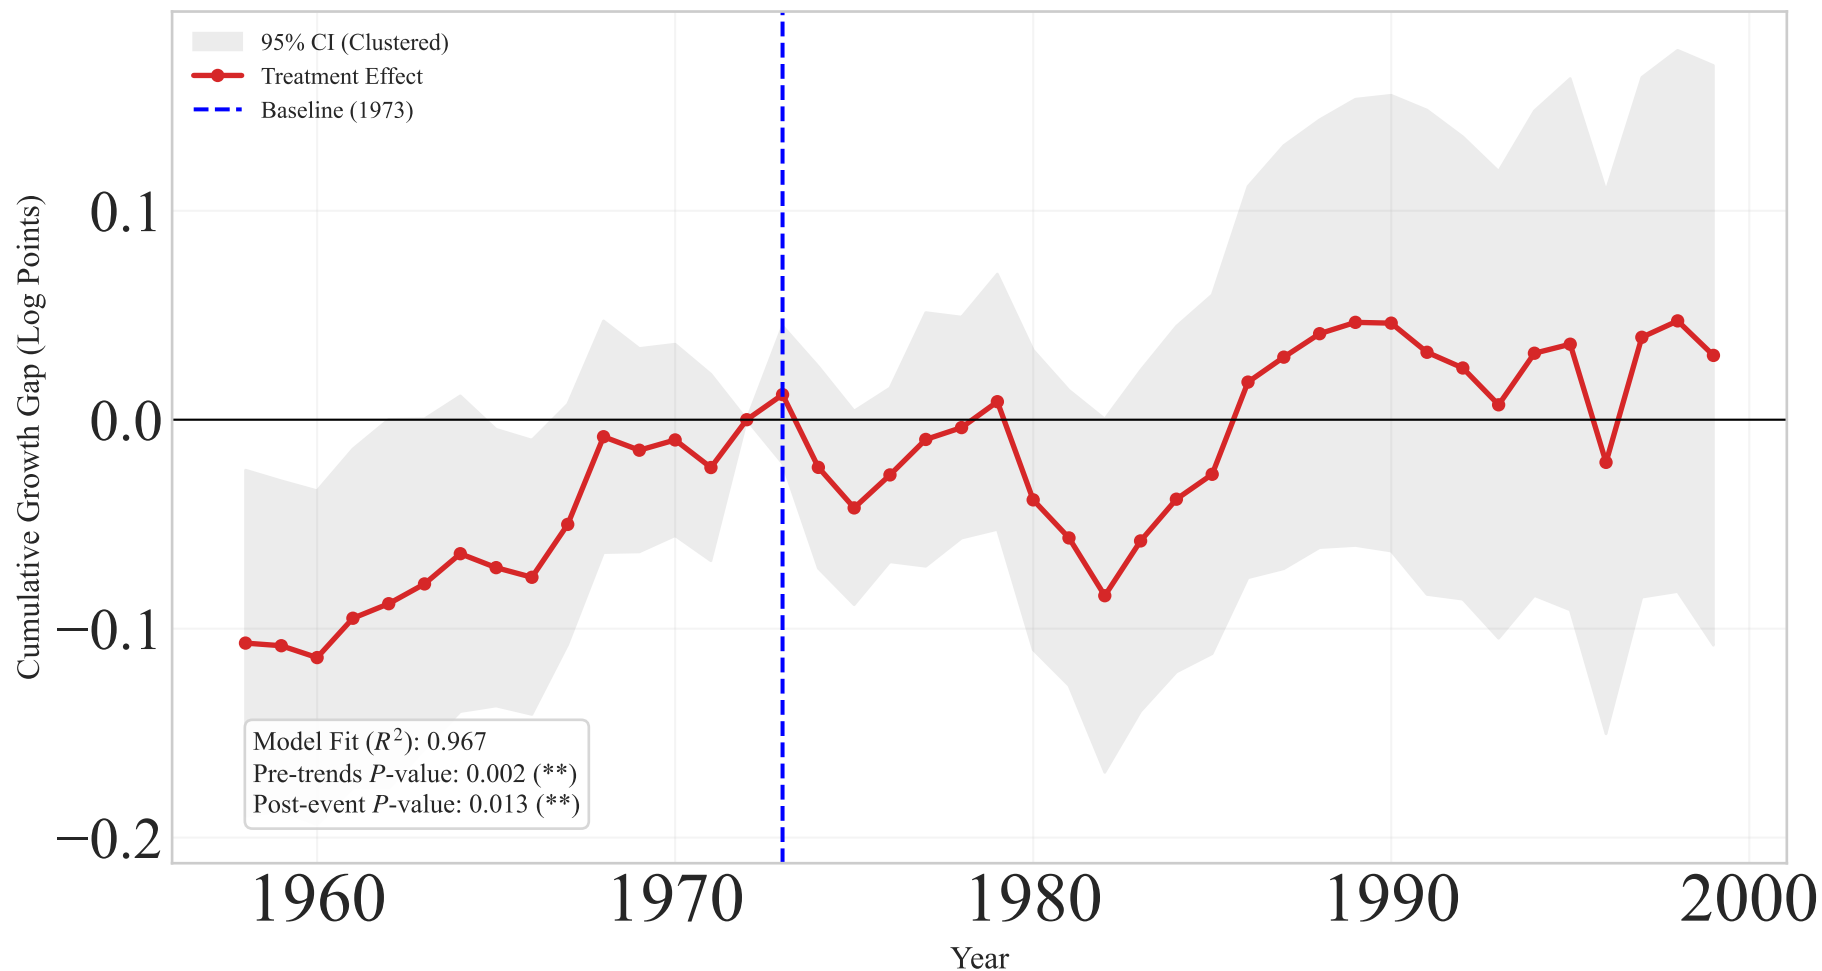

## Model 2: Efficiency Adjustment (Intensity) Method: Dynamic

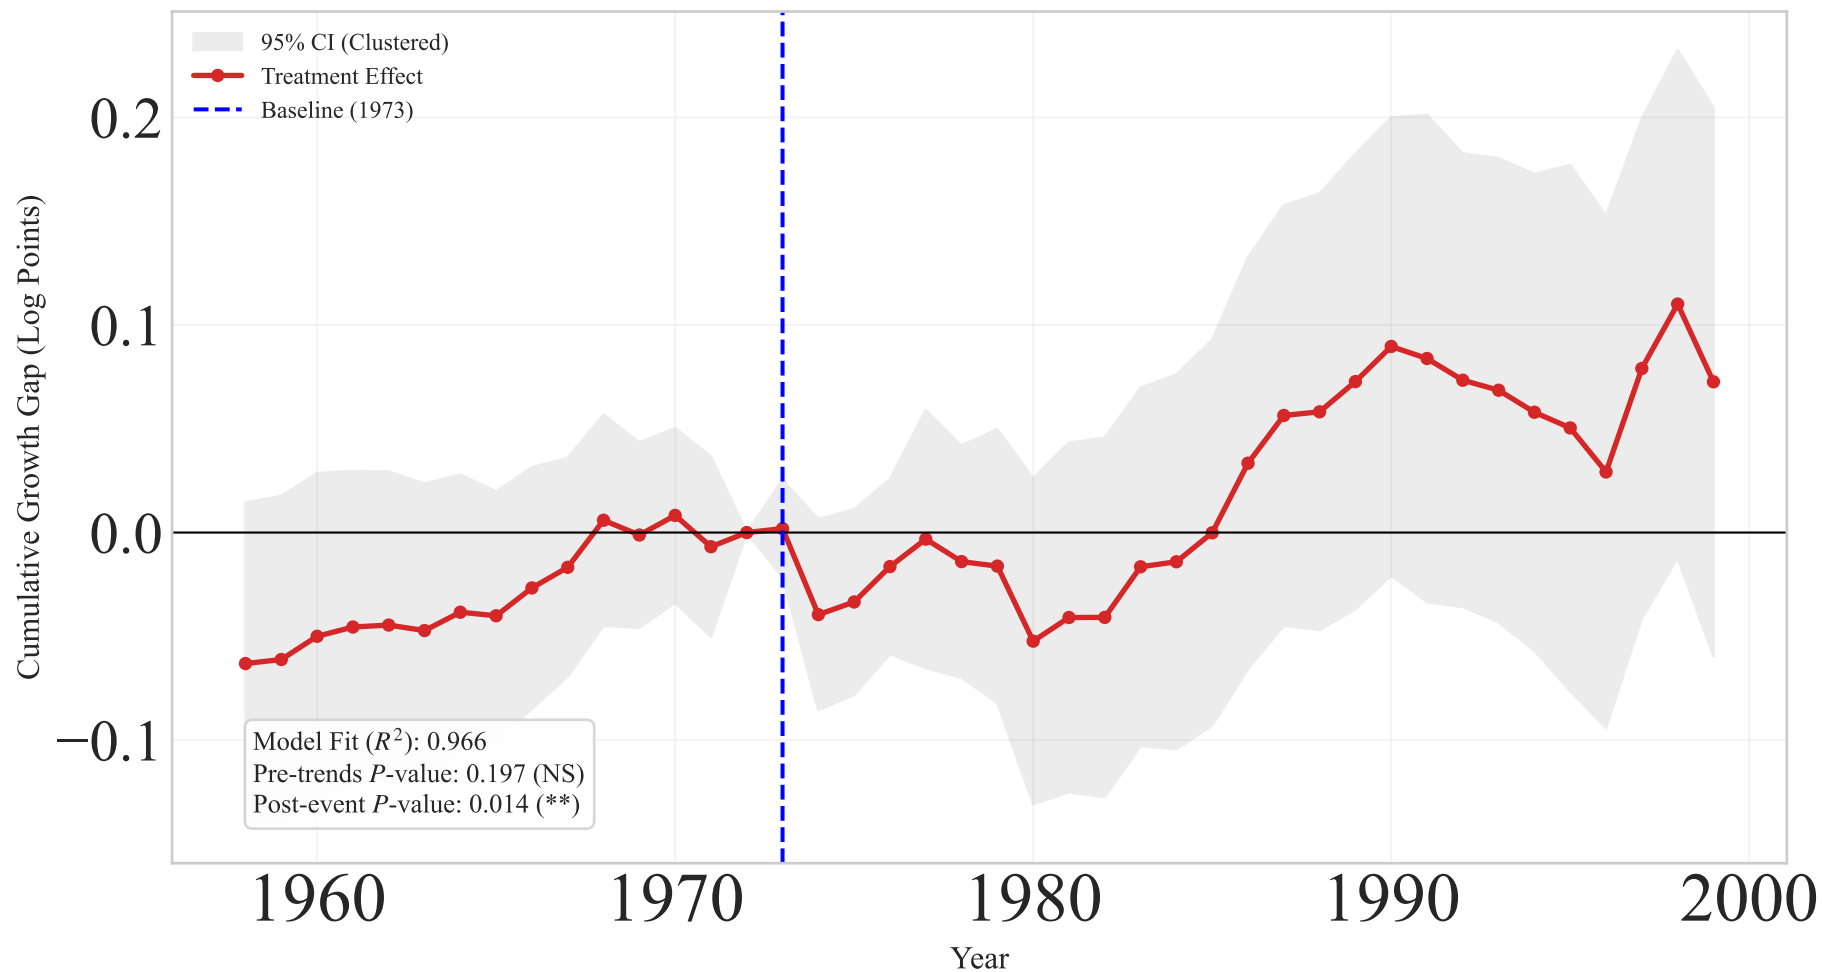

## **Model 3: Cumulative Economic Impact (Output Levels) (All 5 Matching Methods)**

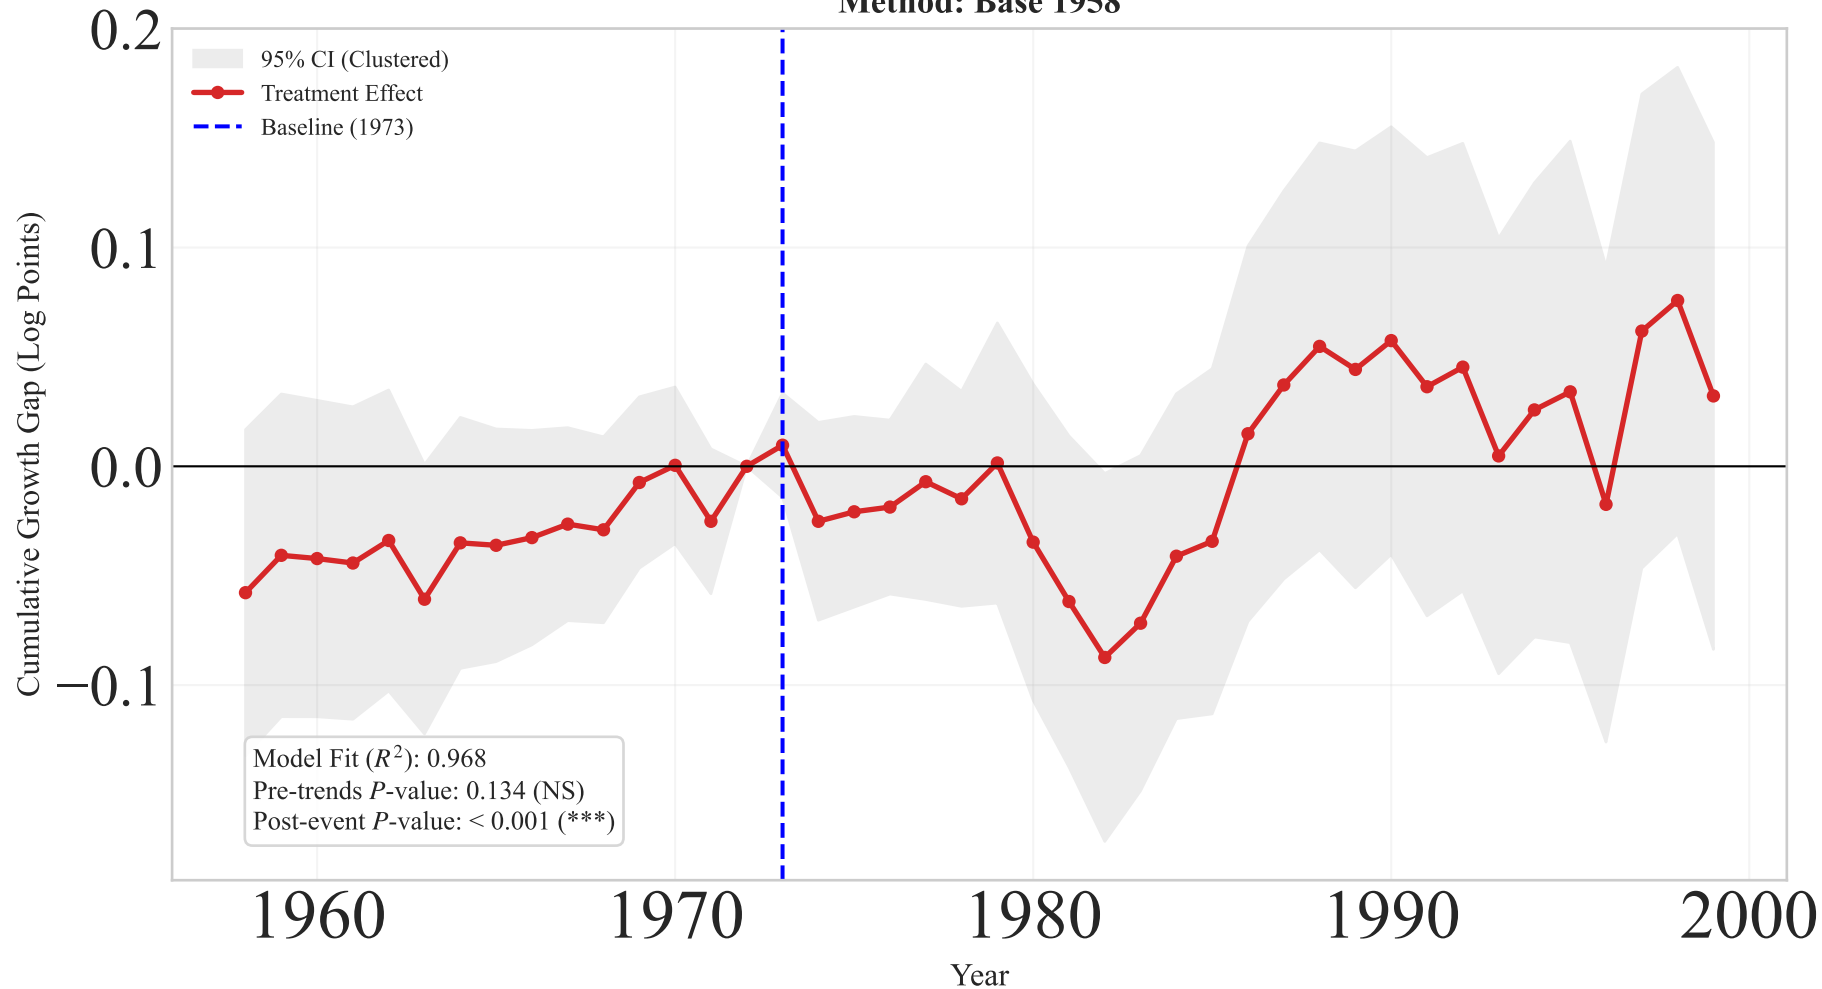

### Model 3: Cumulative Economic Impact (Output Levels) Method: Base 1968-72

### Model 3: Cumulative Economic Impact (Output Levels) Method: Base 1958-72

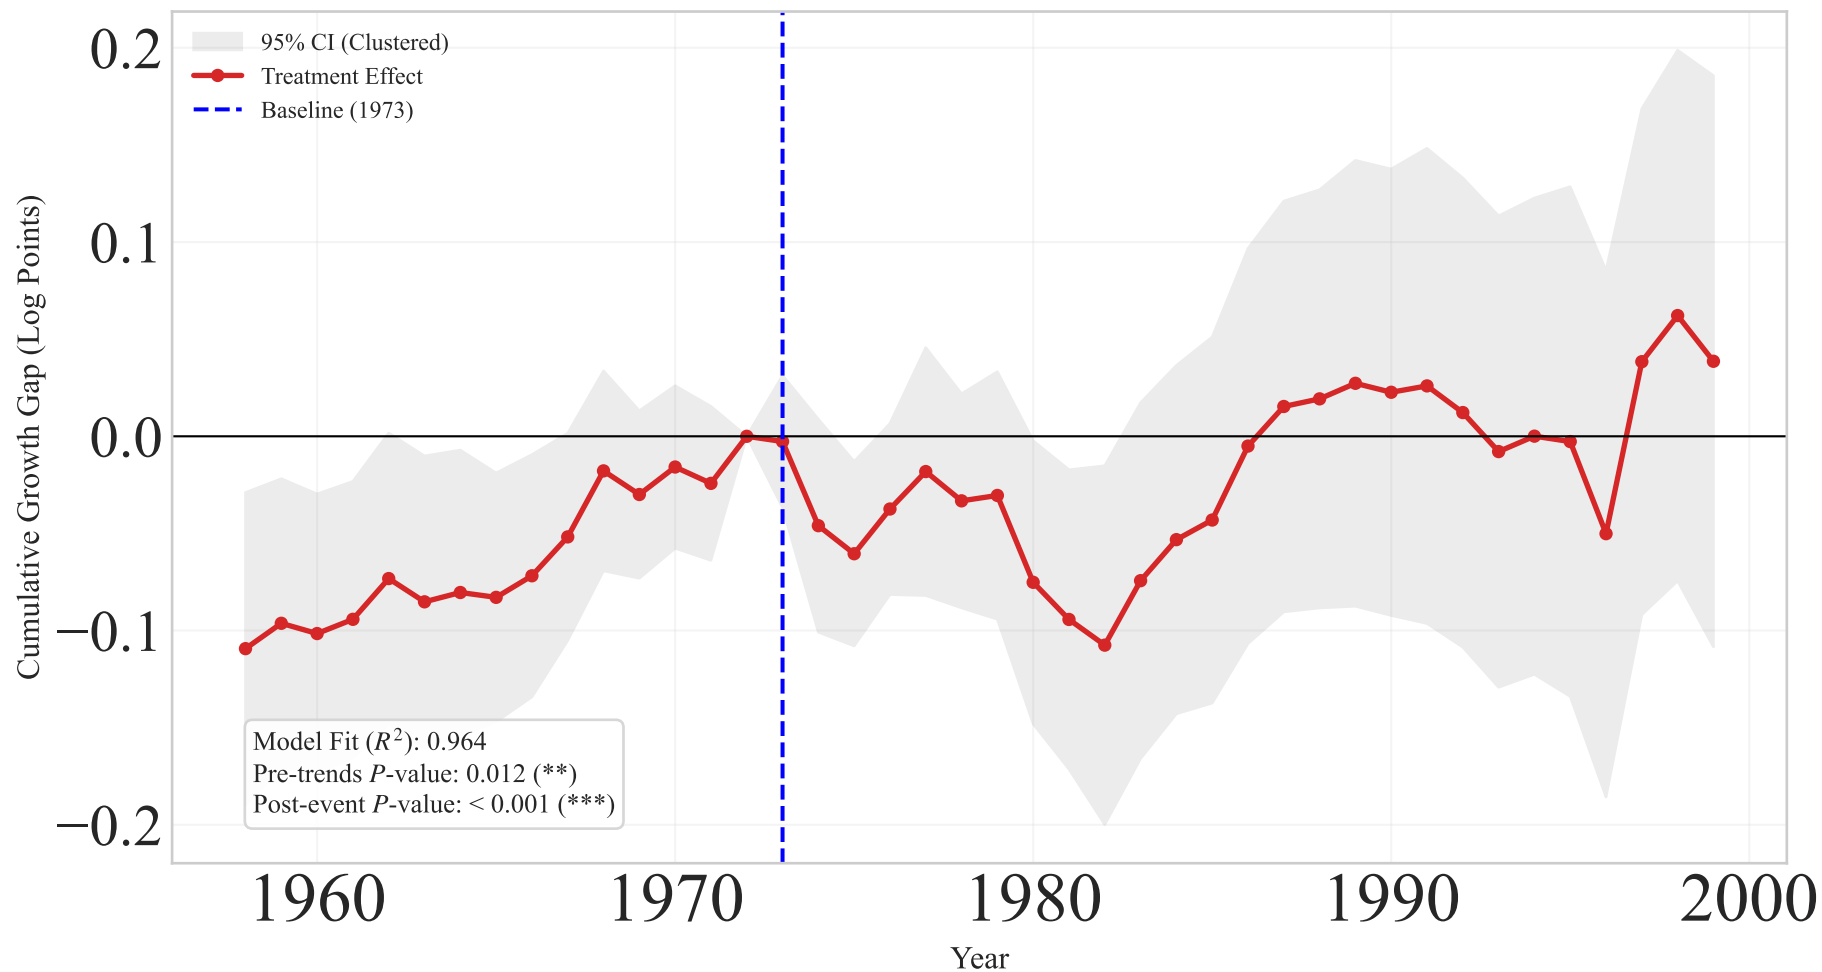

### Model 3: Cumulative Economic Impact (Output Levels) Method: Base 1958

### Model 3: Cumulative Economic Impact (Output Levels) Method: Base 1972

### Model 3: Cumulative Economic Impact (Output Levels) Method: Dynamic
